Question: 4		Answer: A
Question: 4		
	Question: 4	
Which tool would you use to retrieve detailed information about a significant occurrence in a	Which tool would you use to retrieve detailed information ab	out a significant occurrence in a

https://www.certkillers.net

B. System Information C. System Monitor D. Resource Monitor	
	Answer: A
Question: 5	
Which task is executed during the Power-On Self Test (POST)?	
A. The amount of system RAM is detected.B. The Master Boot Record is created.C. The operating system is initialized.D. Disk file systems are detected.	
	Answer: A
Explanation: The principal duties of the main BIOS during POST are as follows: verify CPU registers verify the integrity of the BIOS code itself verify some basic components like DMA, timer, interrupt controller (A) find, size, and verify system main memory initialize BIOS pass control to other specialized BIOSes (if and when required) identify, organize, and select which devices are available for booting Question: 6 You configure Volume Shadow Copy Service (VSS) to save previous veri default, the copies of shared folders are stored in: A. A Network Attached Storage (NAS) device. B. A Distributed File System (DFS) share. C. A failover cluster. D. A local volume.	
_	Answer: D
Explanation: Shadow Copy technology requires the file system to be NTFS to be able copies. Shadow Copies can be created on local and external (removable windows component that uses this technology, such as when creating a or automatic System Restore point. Question: 7	or network) volumes by any

By default, group policies are first applied to networked computers when the: A. Computer is backed up. B. Computer starts up.
B. Computer starts up.
C. User accesses a shared drive. D. User runs gpresult.exe.
Answer: B
Question: 8
A domain controller that is designated to perform a set of specialized domain controller tasks is commonly referred to as a/an:
A. Windows Internet Name Service (WINS) server
B. Operations Master
C. Organizational Unit
D. Primary domain controller
Answer: B
7 III SWELL B
Evaluation
Explanation:
Operations Master Roles
Operations Master Roles The five operations master roles are assigned automatically when the first domain controller in a
