Question: 1

Which two statements about Spark and MX components are true? (Choose two.)

- A. For each MX component, there is a corresponding Spark component
- B. For many MX components, there is a corresponding Spark component
- C. Spark components implement functionality and appearance in separate classes
- D. Spark components are extended to customize layout, just like MX components
- E. Spark and MX components CANNOT be used within the same application

Answer: B, C

Question: 2

Which statement about Spark components is true?

- A. SkinnableComponent is a superclass of all Spark components
- B. UIComponent is NOT a superclass of Spark components
- C. Spark components CANNOT be used in the same application with MX components
- D. NOT all Spark components are skinnable

Answer: D

Question: 3

Which approach allows you to specify a layout for a Spark container?

- A. Each Spark container class defines a specific layout, so you must choose the Spark container corresponding to the layout you desire
- B. You must specify a CSS layout style corresponding to the id of the Spark container
- C. You must specify a value of "absolute", "horizontal" or "vertical" within the layout attribute of the Spark container
- D. You must specify one of the Spark layout classes within the layout attribute of the Spark container

Answer: D

Question: 4

Which statement comparing Spark and MX layouts are true?

- A. Spark layouts use layout classes, while MX layouts do not
- B. Spark and MX share the same layout attribute values
- C. Spark layouts do NOT support absolute positioning, unlike MX layouts
- D. Spark components do NOT have default layouts, so a layout must be specified

Answer: A

Question: 5

You want to create a sub class of `LayoutBase`. Which method must be overridden to specify positioning?

- A. `layout()`
- B. `measure()`
- C. `commitProperties()`
- D. `updateDisplayList()`

Answer: D

Question: 6

You want to create a custom layout to display a number of images in a carousel. Which superclass should you extend to create your custom layout?

- A. `HorizontalLayout`
- B. `VerticalLayout`
- C. `LayoutBase`
- D. `TileLayout`

Answer: C

Question: 7

Given the following code

```
<s:TextInput id="myTextInput" />
```

Which will allow you to set the content that will be displayed in the control?

- A. `myTextInput.label`
- B. `TextInput.label`
- C. `myTextInput.text`
- D. `TextInput.text`

Answer: C

Question: 8

Which property of the `NumericStepper` gives you access to the number that is displayed?

- A. `text`
- B. `value`
- C. `index`

D. number

Answer: B

Question: 9

You want to use a field to capture a single line of typed input, with an approximate width of 30 characters. Which statement should you use?

- A. `<s:TextInput width="30"/>`
- B. `<s:TextInput measuredWidth="30"/>`
- C. `<s:TextInput widthInChars="30"/>`
- D. `<s:TextArea measuredWidth="30"/>`

Answer: C
