Assessment: IBM WebSphere Portal 8.0 Solution Development

QUESTION: 60

When writing a custom portlet service, what interface must be implemented to make use of the portlet service life-cycle methods?

- A. com.ibm.portal.portlet.service.spi.PortletServiceRegistryService
- B. com.ibm.portal.portlet.service.spi.PortletService
- C. com.ibm.portal.portlet.service.spi.PortletServiceLifeCycle
- D. com.ibm.portal.portlet.service.spi.PortletServiceProvider

Answer: D

QUESTION: 61

Which of the following options is not a valid parameter of the login() method of the Portlet Login service (interface com.ibm.portal.portlet.service.login.LoginService)?

- A. char[] password - The password of the user.
- B. java.lang.String userID - The user ID of the user.
- C. java.net.URL redirectURL - The login redirect URL.
- D. javax.security.auth.Subject subject - A security subject to be passed to the WebSphere Application Server login modules that can be null if not needed.

Answer: C

QUESTION: 62

Which option best describes how JSR 286-compliant portlets and widgets interact with each other?

- A. Portlets and widgets cannot interact with each other.
- B. Widgets and portlets can interact by using shared render parameters and events.
- C. Widgets and portlets can interact by using shared render parameters.
- D. Widgets and portlets can interact by using events.

Answer: B

QUESTION: 63

Dale is asked to create a new theme for IBM WebSphere Portal based on the Portal 8 Modular theme. This new theme will be the only theme applied to pages within the environment. What is the best way for him to proceed with this task?

- A. Make a copy of the Modular theme to create a new, separate theme.
- B. Edit the Modular theme directly.
- C. Make a copy of the Modular theme to create a new, separate theme. Then remove all the other themes from the environment as they won't be used.
- D. Edit the Modular theme directly and remove all the other themes from the environment.

Answer: A

QUESTION: 64

Ted is developing a module that will provide content to the Markup sub-contribution type. This Markup sub-contribution will contain some inline JavaScript. What will happen if Ted makes this module deferred rather than non-deferred?

- A. The script code inside the markup will not be evaluated and run when the deferred module is loaded.
- B. The script code inside the markup will be evaluated and run. However, it will throw an exception since its being loaded from a different domain.
- C. The script code inside the markup will be evaluated and run without error when the deferred module is loaded.
- D. The server-side combiner framework will not allow JavaScript inside of the Markup contribution type.

Answer: A

QUESTION: 65

Jeanelle is advising a client on modular themes in IBM Websphere Portal 8.0. Which of the following statements would be incorrect and therefore not communicated to them?

- A. Global theme module contributions are defined by using a plugin.xml file.
- B. A developer can define multiple CSS files for a single module by using separate <subcontribution> tags.
- C. A developer can define up to two JavaScript locales per module by using separate <uri> tags.
- D. The contributions folder is the default folder for theme-specific JSON configurations within a given theme.
