A2150-006

Accessment: IBM Tivoli Identity Manager V5.1 Implementation

E. Configure the setting `logger.trace.level` for maximum detail in the trace log

Answer: C, D

QUESTION: 147

A functioning IBM Tivoli Identity Manager (Tivoli Identity Manager) test environment has been configured and tested and is ready to move into production. The information in the Tivoli Identity Manager Directory Server has been migrated to production. Additional configuration information should be promoted from the Tivoli Identity Manager server file system. Which additional data would need to be promoted to production?

- A. The `<ITIM-HOME>` directory
- B. The `enroleDatabase.properties` file
- C. The customizations defined in the `ui.properties` file
- D. The audit tables in the Tivoli Identity Manager database

Answer: C

QUESTION: 148

When migrating IBM Tivoli Identity Manager (Tivoli Identity Manager) from a test to a production environment, which task is valid?

- A. Export all the LDAP user accounts from test to production.
- B. Use the Import/Export feature to migrate the Tivoli Identity Manager configuration.
- C. Assign the Tivoli Identity Manager test server the same host name as the production server.
- D. Copy all the IBM Tivoli Directory Server data files to the Tivoli Identity Manager production system

Answer: B

QUESTION: 149

After testing the SSL connection between the IBM Tivoli Identity Manager V5.1 server and the directory server, the login fails. Which two options should be checked? (Choose two.)

- A. The `.der` file is corrupted.
- B. The `truststore` file is corrupted.
- C. The path to the `.der` file is valid.
- D. The path to the `truststore` file is valid.
- E. The path to the `IdapConfig` file is valid

Answer: B, D

QUESTION: 150

Consider an identity synchronization scenario at a customer where the customer wants to pull in identities at scheduled times, and push emergency identity deletes to IBM Tivoli Identity Manager (Tivoli Identity Manager) for offboarding in near real time. Which statement is true in this scenario?

- A. A DSML identity feed service in Tivoli Identity Manager can onboard and offboard identities.
- B. Identities deleted in Tivoli Identity Manager during an identity feed are never placed into the Recycle Bin.
- C. Reconciling an identity feed service with the Use Workflow option enabled will allow provisioning and separation of duty policies to be evaluated during processing.
- D. An IDI data feed identity service can be reconciled to pull in identities into Tivoli Identity Manager, and can be contacted by an external process to push identities to Tivoli Identity Manager.

Answer: D

QUESTION: 151

A manual service has been created to provision voice mail accounts in IBM Tivoli Identity Manager (Tivoli Identity Manager). Which reconciliation strategy is available to reconcile voice mail accounts?

- A. The voice mail accounts can be reconciled with a CSV file that contains voice mail account attribute and group information.
- B. Reconciliation is a redundant concept for manual services because Tivoli Identity Manager does not actually communicate with the remote platform.
- C. Account data must be reconciled by using an external process or utility that can read voice mail account data and use the Tivoli Identity Manager API to perform reconciliation.
- D. The voice mail account and group data must be sent over as a form submittal using HTTP or HTTPS to the Tivoli Identity Manager 5.1 Reconcile Manual Service servlet at `http(s)://itimServer:port/itim/reconcileManualServlet`.

Answer: A

QUESTION: 152

What are two means of testing connectivity to the IBM Tivoli Identity Manager LDAP directory? (Choose two.)

- A. DBConfig
- B. runConflg
- C. Idapsearch
- D. SetupEnrole
- E. WebSphere administrative console

Answer: B, C

QUESTION: 153

Which statement is true for the use of V4.6 adapters with IBM TivoliIdentity Manager (Tivoli Identity Manager) V5.1?

- A. Tivoli Identity Manager V5.1 only supports V5.X adapters.
- B. All V4.X adapters are fully supported by Tivoli Identity Manager V5.1.
- C. All V4.6 adapters based on RMI are fully supported by Tivoli Identity Manager V5.1.
- D. All non-FTP V4.6 adapters can be used with Tivoli Identity Manager V5.1 (upgrade scenario); the adapters will not support any new V5.1 adapter features.

Answer: D

QUESTION: 154

In IBM Tivoli Identity Manager (Tivoli Identity Manager), which two data can the DBPurge utility affect? (Choose two.)

- A. Orphaned accounts
- B. Auditing data in the Tivoli Identity Manager database
- C. identities which have been unused for a period of time
- D. The current error backlog in the WebSphere MessagingQueue
- E. Transactional / Reconciliation data in the Tivoli Identity Manager database

Answer: B, E

QUESTION: 155

IBM Tivoli Identity Manager (Tivoli Identity Manager) reconciliations are resource-intensive operations that can take a long time for services with a large account population. Which option will improve reconciliation performance?

- A. Enable Tivoli Identity Manager server-side sorting.

- B. Decrease the default maximum duration as specified in the reconciliation schedule.
- C. Decrease theSearchALUnusedTimeout configuration parameter in the RMI Dispatcher.
- D. Limit the number of attributes returned by the adapter and processed by Tivoli Identity Manager

Answer: D

QUESTION: 156

Which option correctly describes a task to be done before the installation of a fix pack on the IBM Tivoli Identity Manager V5.1 server?

- A. Back up the WebSphere properties files.
- B. Back up all IBM Tivoli Directory Integrator configuration files.
- C. Make sure all running processes have completed successfully.
- D. Back up all configuration files, including properties files located in the ITIM_HOME/data directory

Answer: D

QUESTION: 157

Where are the challenge-response QUESTION NO:s and Answers stored?

- A. enRole.properties file
- B. IBM Tivoli Identity Manager Database
- C. WebSphere Application Server database
- D. IBM Tivoli Identity Manager LDAP Directory

Answer: D

QUESTION: 158

Which statement is true when evaluating a placement rule on an identity feed service?

- A. The placement rule is only evaluated if the "Use workflow" option is checked.
- B. The placement rule determines the placement of the identity into organizational roles.
- C. The placement rule returns the organizational container where the identity is to be anchored.
- D. The placement rule returns a true or false value to determine if an identity can be placed into IBM Tivoli Identity Manager or not

Answer: C

QUESTION: 159

Which statement is true when evaluating a placement rule on an identity feed service?

- A. The placement rule is only evaluated if the "Use workflow" option is checked.
- B. The placement rule determines the placement of the identity into organizational roles.
- C. The placement rule returns the organizational container where the identity is to be anchored.
- D. The placement rule returns a true or false value to determine if an identity can be placed into IBM Tivoli Identity Manager or not

Answer: C
