D. $NCHOME/precision/scripts/sh/scripts/ncp_storrn_validate.sh db

Answer: A

Explanation:

Question: 4

DRAG DROP
What is the correct sequence of steps for the requirements-gathering phase?
Select all that apply.

Unordered Options		Ordered Options
Identify stakeholders		1
Confirm understanding of requirements with stakeholders		2
Get stakeholders to give voice to their requirements, pain points, and wish lists and get them to explain existing business processes	> <	3
Create a document of understanding that specifies requirements and defines the scope of the project		4
Document stakeholder requirements and existing processes		5
Understand what the customer's business does and where they operate		6

Answer:

Unordered Options		Ordered Options	
		1	Identify stakeholders
		2	Confirm understanding of requirements with stakeholders
	> <	3	Get stakeholders to give voice to their requirements, pain points, and wish lists and get them to explain existing business processes
		4	Create a document of understanding that specifies requirements and defines the scope of the project
		5	Document stakeholder requirements and existing processes
		6	Understand what the customer's business does and where they operate

Question: 5

A custom discovery stitcher creates a temporary table or array called customData using the Record customData; statement. Since implementing the custom stitcher, the amount of available memory on the ITNM server decreases more than normal while discovery is running. What is a potential problem?

A. The customData table was not truncated before running the new discovery
B. The stitcher is missing the delete (customData); statement
C. The stitcher is missing the empty (customData); statement
D. The stitcher is missing the end statement on the last line of the stitcher so the stitcher never finishes

Answer: A
