Answer: B

Question: 7

John is using the new Java editor to create a Java agent that will fill up some items in a Lotus Notes document. During the editing process, John realizes that a specific variable name is not the name of the item he wishes to update, but he used that variable many times in the code already. How will John change the name of the variable in the code?

- A. Click the menu item Edit -> Find/Replace in the dialog box, enter the new variable name, and click replace all.
- B. Click on the menu item Edit -> Rename in the dialog box, enter the new variable name, and click replace all.
- C. Double-click the variable name to select it, right-click, select Rename from the menu, enter the new variable name, and press Enter.
- D. Double-click the variable name to select it, right-click, select Refactor from the menu, then select Rename, enter the new variable name, and press Enter.

Answer: D

Question: 8

Eric is using Peter's Lotus Domino Designer. He is developing an XPage component. When launching the Lotus Domino Designer help through Help/Help - Contents, anything he is searching on XPages is not found by the Eclipse help system. Which option has Peter set that does not find any XPage help information?

- A. XPage help is available only from the main topic or directly from an XPage element.
- B. Peter search scope is limited to the LotusScript languagePeter? search scope is limited to the LotusScript language
- C. The HTTP proxy parameters that Peter has defined are incorrectly set; Eric needs to correct them.
- D. For XPage help Eric needs to open an XPage component directly in Lotus Domino Designer. If not, the option will not be available.

Answer: B

Question: 9

Devin has been developing an application that includes an XPage. When he opened the application in Designer this morning, he noticed a small "x" icon by the XPages listing in the Applications view. He had closed several of the Eclipse views yesterday, and does not see any errors displayed in the remaining views. How can Devin locate the problems in the source code?

- A. Right-click the "x" icon from the Applications view and select Go To Error. The Problems view displays with the cursor at the first error.
- B. Display the Problems view by selecting Window > Show Eclipse Views > Problems. Right-click a displayed error and select Go To. The Source view opens to the line with the error.
- C. Click to expand the XPages listing. A small "x" icon displays by the XPage with the errors. Double-click the name of the XPage and the Source view opens to the line with the error.
- D. Click to expand the XPages listing. A small "x" icon displays by the XPage with the errors. Double-click the name of the XPage. The Source tab opens with the cursor at the first error line.

Answer: B

Question: 10

Aidan has a number of databases listed in the Application navigator. He wants to sort his applications based on the server where they reside. How can Aidan accomplish this?

- A. Click on Window > Application navigator > Sort > By Server
- B. Click on the Menu icon in the Application navigator and click Sort > By Server
- C. Right click in the Application view and select Sort > By Server
- D. IT can not be done. Once you add a database to the Application navigator that is the order it appears.

Answer: B
