*IBM Sterling Order Management V9.2,(R) Solution Design*

**Answer: B**

**QUESTION: 43**

A business (B1) has its own inventory for items at its internal distribution centers (DC). The business has also on boarded its manufacturers (M1 and M2) on Sterling Order Management. M1 and M2 have their own e-commerce portals, and they have inventory at their own DC. The requirements above have been modeled as follows:

?B1 is enterprise / seller - with inventory organization as B1

?M1 is enterprise / seller - with inventory organization as M1 ?M2 is enterprise /

seller - with inventory organization as M2 ?M1 and M2 are consumable inventory organizations for B1 Which of the following statements is INCORRECT?

- A. M1 can view assigned demands for M1 DC.
- B. M1 can view unassigned demands for M1 and B1 enterprise orders.
- C. M2 can view unassigned demands for M2 enterprise orders.
- D. B1 can view assigned demands for B1 DC, M1 DC, and M2 DC.

**Answer: B**

**QUESTION: 44**

A customer places an order for four units of an item, while only three units are available. The business has a requirement to only allow full quantity reservations (i.e. disallow partial reservations). Which of the following can MOST efficiently accomplish the requirement for full quantity only reservations?

- A. Customize the solution to fetch the inventory picture before the reserveOrder is invoked.
- B. Set AllocationRuleID on reservation input, where the rule ID has "Line Ship complete" constraint enabled.
- C. Configure "Attempt to reserve the complete quantity of an order line." on Sales Order -> Fulfillment -> Fulfillment Rules -> Reservations.
- D. No actions are required. By default, the out-of-the-box product allows only full quantity reservations.

**Answer: B**

**QUESTION: 45**

It is observed during a performance test that order processing time to schedule an order has slowed down significantly. The number of orders created and the number of order lines per order has not changed across the test runs. The database administrator

noticed blocking locks and high degrees of active connections. How can this issue be resolved?

- A. Increase the number of connections on the connection pool.
- B. Increase the number of scheduling agents so that the throughput of the system is increased.
- C. Verify whether there is a high volume of activity for specific items. If so, ensure that the HOT SKU feature is turned on in order to avoid locking the order.
- D. Verify whether there is a high volume of activity for specific items. If so, ensure that the HOT SKU feature is turned on in order to avoid locking the inventory item.

**Answer:** D

**QUESTION:** 46

A business needs to integrate with a website in order to provide inventory updates from Sterling Order Management. The requirements are as follows: Requirement 1 - Send a message to website with inventory picture each time it crosses a threshold for minimum/maximum. Requirement 2 - Send a message to website with complete inventory picture once a month. Requirement 3 - Resend the last inventory picture ad-hoc when explicitly requested by website. This setup should be implemented as an:

- A. event-based (RTAM) monitor and setup thresholds. Implement: Requirement 1, using activity sync mode Requirement 2, using full sync mode Requirement 3, using quick sync mode
- B. event-based (RTAM) monitor and setup thresholds. Implement: Requirement 1, using quick sync mode Requirement 2, using full sync mode Requirement 3, using activity based mode
- C. action-based (Availability) monitor and setup thresholds. Implement: Requirement 1, using activity based mode Requirement 2, using full sync mode Requirement 3, using quick sync mode
- D. action-based (Availability) monitor and setup thresholds. Implement: Requirement 1, using quick sync mode Requirement 2, using full sync mode Requirement 3, using activity based mode

**Answer:** A

**QUESTION:** 47

A business wishes to schedule orders against future supply (i.e. purchase orders). However, if a PO has not been received within 2 days after ETA has passed, the business wants to assume this PO is not going to arrive and exclude it from availability calculations. How can this be achieved?

- A. Set "Past Due Supply Days" to 2 in the ATP rule.
- B. Set "Backward Consumption Days" to 2 in the ATP rule.
- C. Implement getExternalSupply user exit to override supply picture for POs.
- D. Implement getSupplyCorrections user exit to exclude supplies where more than 2 days have passed since the ETA of the PO.

**Answer:** A

**QUESTION:** 48

Which three of the following are TRUE in a single instance multi-schema deployment?

- A. Additional schemas can be added to an existing enterprise.
- B. Ship nodes can be shared across enterprise in separate schemas.
- C. Enterprises upgrade independently, due to isolation of Transaction data.
- D. Enterprises can inherit rules from another enterprise within different Configuration schemas.
- E. Enterprises can inherit rules from another enterprise within this same Configuration schema.
- F. Application server monitoring/maintenance can be performed at an aggregate level across all schemas.

**Answer:** C, E, F

**QUESTION:** 49

A business has a requirement to generate shipping labels. Which out-of-the-box adapter will fulfill this requirement?

- A. DHL Adaptor
- B. FedEx Adaptor
- C. PierBridge Adaptor
- D. ConnectShip Adaptor

**Answer:** C

**QUESTION:** 50

In the current IBM Sterling Selling and Fulfillment implementation, there are new tables defined by the implementation team that contain configuration data, and this data needs to be migrated across many environments. In order to migrate the data

using the Configuration Deployment Tool (CDT), a solution designer should add the new table list in which of the following files?

- A. \$INSTALL\_DIR/resources/ydkresources/ydkprefs.xml
- B. \$INSTALL\_DIR/properties/customer\_overrides.properties
- C. \$INSTALL\_DIR/resources/ydkresources/cdt\_custom.xml
- D. \$INSTALL\_DIR/resources/ydkresources/cdt\_dbdefaults.properties

**Answer:** C

**QUESTION:** 51

Which of the following is true when upgrading between two major versions of Sterling Order Management, for example, from V8.5 to V9.2?

- A. Migration must be run between each minor release.
- B. Channel applications can be upgraded in a phased approach.
- C. V9.2 can be installed in the same directory as the existing V8.5.
- D. In a Multi Schema installation, all colonies need to be migrated at once.

**Answer:** B

**QUESTION:** 52

In the current Sterling Selling and Fulfillment implementation, some agent servers are configured with high threading levels expecting a high traffic volume. However, the traffic volume is lower than anticipated. What will be the effect of this on the agent servers and the system?

- A. Better performance on agent servers as there is low traffic.
- B. Valuable system resources are consumed by idle threads.
- C. The throughput will be higher as the threading level is high.
- D. There will be no effect on the system as there is low traffic.

**Answer:** B

**QUESTION:** 53

A Sterling Distributed Order Management application is deployed in New York. The order number

"10001" is created in Japan, and the Customer Service Representative (CSR) supports this order from London. The date and time values are shown to the CSR based on which of the following two locales?

- A. The application locale.
- B. The locale of the CSR.
- C. The locale defined in the property file.
- D. The node's locale for delivery services.
- E. The locale in which the order was created.

**Answer:** B, D

**QUESTION:** 54

Refer to the following image for details on ORDER number "Y10001"

Item	Quantity	Merchandize Tax	Shipping Charge
X	7	12.00	10.00
Y	4	10.00	5.00

A customer wants to return three quantities of an item to a business. The business requirement is that 50% of the shipping charge should be refunded for any partial return. How can a solution designer model the refund upfront and monitor the receipt of goods?

- A. Call repriceOrder API for the return order document type.
- B. Implement YFSOrderRepricingUE for the return order document type.
- C. Call getOrderPrice API and invoke YPMCCalculateShippingCharge user exit at order level.
- D. Out of the box configuration is available in Sterling Order Management.

**Answer:** B
