*InfoSphere DataStage v11.3*

**QUESTION: 58**

Archive files can contain assets from multiple exports of multiple tools. When importing into a project from an archive file with the istool command, which order of asset types below would yield the best performance?

- A. Users and groups, Common metadata, InfoSphere DataStage and QualityStage assets, Reports, Custom attributes for InfoSphere Information Governance Catalog
- B. Common metadata, Users and groups, Custom attributes for InfoSphere Information Governance Catalog, InfoSphere DataStage and QualityStage assets, Reports
- C. Common metadata, Users and groups, Custom attributes for InfoSphere Information Governance Catalog, InfoSphere Data Stage and QualityStage assets
- D. Users and groups, Common metadata, InfoSphere DataStage and QualityStage assets, Custom attributes for InfoSphere Information Governance Catalog, Reports

**Answer: A**

**QUESTION: 59**

In your project there is a top level Sequencer job which has multiple sub sequencers and jobs. You have to move this Sequencer job to a new project. How do you determine which objects have to be exported?

- A. Select top level sequencer job and click on "Export" option
- B. Select top level sequencer job and click on "Find dependencies" option
- C. Select top level sequencer job and click on "Find dependencies (deep)" option
- D. Select top level sequencer job and click on "Edit->Job Properties -> Dependencies"

**Answer:** D

**QUESTION:** 60

For very large records, you may need to set the following environment variable with an appropriate value in order to allow the job to run successfully:

- A. \$APT\_MONITOR\_SIZE
- B. \$APT\_RECORD\_COUNTS
- C. \$APT\_DISABLE\_COMBINATION
- D. \$APT\_DEFAULT\_TRANSPORT\_BLOCK\_SIZE

**Answer:** D

**QUESTION:** 61

Which of the following is TRUE?

- A. The Modify stage can keep or drop records
- B. The DB2 Connector stage can have, at most, one input link
- C. The Copy stage can be used for implicit data type conversions
- D. When runtime column propagation is enabled, you can use output mapping on a stage to rename or drop columns

**Answer:** D

**Reference:**

**QUESTION:** 62

Which Connector Stage doesn't support reject Link

- A. DB2 Connector
- B. ODBC Connector
- C. Oracle Connector
- D. Netezza Connector

**Answer:** B

**Explanation:**

Reject links are not supported by any connectivity source stage. This includes the Px Sybase, Px ODBC, Px DB2Z, Px Classic Federation stages, Px DB2 and Px Oracle stages.

**QUESTION: 63**

Select the correct command to reset a password to Info1234 for user srv\_etl in the Information Server internal registry, in the Unix environment.

- A. iisAdmin.sh -user srv\_etl -password Info1234
- B. iisAdmin.sh -user -userid srv\_etl -password Info1234
- C. SessionAdmin.sh -user -userid srv\_etl -password Info1234
- D. DirectoryAdmin.sh -user -userid srv\_etl -password Info1234

**Answer: C**

**QUESTION: 64**

Which of the following statements about real time job design is TRUE?

- A. DSJobInvocationId is not required for the target sequential file.
- B. A non-Multiple Instance DataStage job can be activated for ISD service.
- C. A DataStage job must have an ISD Input stage, but an ISD Output stage is not required.
- D. The Information Services Director server starts job instances on one or more DataStage servers for load balancing and scalability.

**Answer:** D
