*IBM WebSphere Operational Decision Management V8.0
Application Development*

- A. RuleApp Project
- B. Rule Project from Decision Center
- C. Java Project for Rules
- D. Client Project for RuleApps

Answer: C

QUESTION: 46

An application developer needs to ensure that a set of rules covers all possible cases leaving no gaps. Which artifact should the application developer use to perform this task?

- A. Ruleset execution trace
- B. Rule project statistics report
- C. Consistency analysis report
- D. Completeness analysis report

Answer: D

QUESTION: 47

An application developer currently has a rule project with only the following two rules. It is required that at least one rule is executed for all transactions.

Rule 1:

```
definitions
  set 'Customer1' to a customer ;
if
  the age of Customer1 is at least 25
then
  set the rating to 5;
```

Rule 2:

```
definitions
  set 'Customer1' to a customer ;
if
  the score of Customer1 is more than 30 and
  the age of Customer1 is more than 21
then
  set the rating to 10;
```

After running a completeness analysis, the application developer will be asked to instantiate which of the following?

A. Zero rules, the rule project is complete.

B. **One Rule:**

```
definitions
  set 'Customer1' to a customer ;
if
  the age of Customer1 is at most 21
then
  <action> ;
```

C. **Two Rules:**

```
definitions
  set 'Customer1' to a customer ;
if
  the age of Customer1 is at most 21
then
  <action> ;
```

```
definitions
  set 'Customer1' to a customer ;
if
  the age of Customer1 is less than 25
  and the score of Customer1 is at most 30
then
  <action> ;
```

D. **Three Rules:**

```
definitions
  set 'Customer1' to a customer ;
if
  the age of Customer1 is at most 21
then
  <action> ;
```

```
definitions
  set 'Customer1' to a customer ;
if
  the score of Customer1 is 30
then
  <action> ;
```

```
definitions
  set 'Customer1' to a customer ;
if
  the age of Customer1 is less than 25
  and the score of Customer1 is at most 30
then
  <action> ;
```

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Answer: C

QUESTION: 48

An application developer is validating a rule project in Rule Designer and needs to create a new DVS Excel File Run Configuration. Instead of testing all of the rules, the

new run configuration must also specify a subset of the rules to test. Which setting in the run configuration must the application developer apply?

- A. On the Rules tab, specify the rules to test.
- B. On the Excel File tab, specify the rules to test.
- C. On the Excel File tab, click Browse next to Rule Project and specify the rules to test.
- D. On the Extraction tab, select to use an extractor which specifies the rules to test.

Answer: D

QUESTION: 49

The Business Object Model (BOM) includes a Customer class with an Age attribute and a Score attribute both of type int. There are three rules and one query:

Rule 1:

```
if
  the score of the customer is at least 50
then
  set the rating to 10;
```

Rule 2:

```
if
  the age of the customer is at least 50
then
  set the rating to 20;
```

Rule 3:

```
if
  the score of the customer is less than 40 and
  the age of the customer is more than 40
then
  set the rating to 30;
```

Query 1:

```
Find all business rules
such that each business rule may apply when [the score of the customer is 5]
```

When the application developer runs Query 1, which rules will be returned?

- A. Rule 1 only
- B. Rule 2 only
- C. Rule 3 only
- D. Rule 1 and Rule 2

E. Rule 2 and Rule 3

Answer: E

QUESTION: 50

An application developer is using Decision Validation Services (DVS) to test business rules. The application developer notices that the required column headings in the generated Excel scenario file template do not contain meaningful text. What should an application developer do to make the column headings meaningful before generating a new scenario file template ?

- A. Manually change the column headings in the scenario file template.
- B. Modify the names of the constructor parameters to give them meaningful names.
- C. Specify meaningful names for column headings during scenario file template generation.
- D. Specify meaningful names on the Business Object Model (BOM) members corresponding to the required columns.

Answer: B
