Version: 12.0

Question: 1

A customer with data centers 1500 km (930 miles) apart wants to create a solution which enables role swaps for high availability
What is the MINIMAL PowerHA offering that will satisfy their requirement?

A. SystemMirror Enterprise Edition
B. SystemMirror Smart Assist
C. SystemMirror Entry Edition
D. SystemMirror Standard Edition

Answer: A

Question: 2

What POWER8 processor capability has been enhanced, relative to POWER7/7+, to enable more efficient processor utilization in support of some applications?

A. Out of order execution
B. Decimal floating point execution
C. Simultaneous Multi-Threading
D. Single precision floating point

Answer: B

Question: 3

A customer wants to deploy SAP HANA on IBM Power Systems.
Which operating system is supported?

A. Ubuntu 14
B. IBM I V7R2
C. SUSESLES 11
D. A1X 7.2

Answer: C

Question: 4

A customer is considering a purchase of a new S812LC server to implement Maria DB. They will not be virtualizing and require a physical console.
What is the supported console?

A. A monitor connected to the integrated VGA port
B. IVM
C. HMC
D. A monitor connected to the standard PCIe graphics adapter

Answer: C

Question: 5

A customer wants to run an in-memory database.
Which model will provide the highest memory bandwidth?

A. S812LC
B. S822LC
C. S812L
D. S822L

Answer: B

Question: 6

A customer anticipates having very heavy network and storage I/O traffic across their virtualized environment. They are interested in segregating the I/O workloads. They also want to be able to perform maintenance on their VIO Servers without downtime.
Which option will satisfy their requirements?

A. Two VIO Servers one handling network and one handling storage
B. Two VIO Servers, each handling a portion of the traffic
C. Four VIO Servers, two handling network and two handling storage
D. Four VIO Servers, each handling a portion of the traffic

Answer: C

Question: 7

Which hypervisar supports two Linux virtual machines on a Power S812LC?

A. PowerVC
B. PowerKVM
C . OPAL (Open Power Abstraction Layer)
D. Power VM

Answer: C

Question: 8

A customer has a SAN team that wants to be able to easily map each LUN to a specific World Wide Port Name (WWPN) on each client LPAR of a POWER8 server
Which technology should be implemented to satisfy the requirement?

A. SAS
B. iSCSI
C. NPIV
D. vSCSl

Answer: C

Question: 9

A customer with POWERS processor-based systems needs an application server that supports environment from single server and medium-sized configurations to large deployments requiring web tier clustering over multiple application server instances.
Which IBM product family will satisfy the customer's requirements?

A. Web Sphere
B. Information Management
C. Cognos
D. Rational

Answer: A

Question: 10

A client has a virtualized Power Systems environment and has the following requirements:
. Support for AIX IBM I, Linux partitions
. Easy to replicate virtual machines
. Policy based workload placement
Which of the following will best satisfy the requirements to manage the environment?

A. HMC
B. Power VC
C. Power VM
D. Cloud Manager with Open Stack

Answer: C

Question: 11

A client is deploying an HPC workload on a cluster of S822LC systems with GPUs.
Which of the following is a supported operating system for the environment?

A. RHEL6

B. AIX7 1
C. Ubuntu 14
D. SLES 11

Answer: D
