Question: 4

Which ConfigEngine task is used to create a virtual portal?

- A. setup-virtual-portal
- B. enable-virtual-portal
- C. create-virtual-portal
- D. install-virtual-portal

Answer: C

Explanation:

Reference:

http://www-01.ibm.com/support/knowledgecenter/SSHRKX_8.0.0/admin/advp_cfgtsk

Question: 5

Leslie has been asked to create a realm for a new virtual portal using sub-branches (base distinguished names) from three LDAP registries: LDAP-A, LDAP-B and LDAP-C.

Which statement must be valid in order to be able to create the realm using LDAP, LDAP-B and LDAP-C?

- A. The short name of the virtual portal administrator distinguished name (for example "wpsadmin") must exist in all three LDAPs.
- B. The base distinguished name of the LDAP registries is not important. Any LDAP registry combination is possible for creating a realm.
- C. Distinguished names must be unique in each registry. For example, if the distinguished name uid=wpsadmin,o=mybiz,c=us exists in LDAP-B, it must not exist in either LDAP-A, or LDAP-C.
- D. The base distinguished names of at least two of the three LDAPs must overlap. For instance, consider that LDAP-A contains o=mybiz,c=us; LDAP-B contains o=east,o=mybiz,c=us; and LDAP-C contains o=mybiz,c=uk. LDAP-A and LDAP-B overlap.

Answer: A

Question: 6

Which statement is true regarding 32-bit portal installation?

- A. 32-bit portal installation is not supported in 8.5.
- B. 32-bit portal installation is fully supported in 8.5.
- C. 32-bit portal installation is supported in 8.5 as 31-bit.
- D. 32-bit portal installation is supported in 8.5 only if the operating system is upgraded to a specific patch level.

Answer: B
