**QUESTION: 87**

Which of the following best describes the role of a reject stage:

- A. When an item is rejected, a reject stage can be triggered that executes pre-defined actions. Once the actions have been executed, the item is returned to the first stage of the workflow.
- B. When an item is rejected, a reject stage can be triggered that executes pre-defined actions. Once the actions have been executed, the item is returned to the previous stage of the workflow.
- C. When an item is rejected, a reject stage can be triggered that executes pre-defined actions. Once the actions have been executed, the item is returned to the first stage of the workflow and the content author is notified.
- D. When an item is rejected, a reject stage can be triggered that executes pre-defined actions. Once the actions have been executed, the item is returned to the stage specified in the reject stage.

**Answer: A**

**QUESTION: 88**

Eli is an IBM Web Content Manager administrator. Owen is a content creator. Eli needs to grant Owen access to the Web Content Manager library that allows Owen to delete content items but not be able to purge the content items. What role should Owen be a member of that gives him the minimum security rights?

- A. User
- B. Administrator
- C. Editor
- D. Manager

**Answer: C**

**QUESTION: 89**

Cindy has assigned a custom workflow action to run when a project enters a specific state in a project. She can create a custom workflow action that could perform all the following actions except?

- A. Automatically delete a project when it is successfully published.
- B. Verify web standards compliance for all assets within the project including items that are not traditionally workflowed, such as components and presentation templates.
- C. Automatically reject a project if it is in review for a certain period of time.
- D. Automatically version a project when it is successfully syndicated.

**Answer:** D

**QUESTION:** 90

Pavel, a content creator, creates News content for his company intranet. In advance of a new product release, he needs to immediately create and get approval for multiple content items, but defer their publication on the website to a later date. How can he accomplish this task?

- A. Set the Live Date in the Workflow section of each content item.
- B. Set the Publish Date in the Workflow section of each content item.
- C. Specify a Scheduled Move Action in the Workflow section. The Scheduled Move Action should refer to the Live Date field.
- D. Specify a Scheduled Move Action for items entering the Publish stage of the workflow. The Scheduled Move Action should refer to the Publish Date field.

**Answer:** B

**QUESTION:** 91

Which of the following statements is true regarding Categories?

- A. Categories allow developers to classify content items that use different authoring templates. These classifications are then used within a menu component to generate a list of related content items.
- B. Categories allow developers to classify content items that use different keywords. These classifications are then used within a navigator component to generate a list of related content items.
- C. Categories allow developers to classify content items that are within different site areas. These classifications are then used within an option selection component to generate a list of related content items.
- D. Categories allow developers to classify content items that are within different site areas. These classifications are then used within a document manager component to generate a list of related content items.

**Answer:** A
