---

---

**Question: 5**

---

You have completed the build for a new application and have had it running for two days. You decide to add monitoring capabilities to your application. After dragging a MON appliance to the grid, you use balloon connectors to connect the mon interface of all your appliances to the mon interface of the MON appliance. Then you click the Monitor button. However, the monitoring function does not work. Before you make a second attempt at running the monitoring function, what do you need to do?

- A. Configure a Monitoring Policy.
- B. Save and restart your application.
- C. Save your application and do no more.
- D. Reconstruct the application, because you cannot add a MON appliance after an application has already been running.

---

**Answer: B**

---
