- A. Underuse
- B. Overuse
- C. Misuse
- D. Illegal use

---

**Answer: C**

---

---

**Question: 3**

---

Crossing the Quality Chasm provided a blueprint for the future that classified and unified the components of quality through six aims for improvement, chain of effects, and simple rules for redesign of healthcare. The six aims for improvement, viewed also six dimensions of quality. Which of the following is NOT out of those dimensions?

- A. Safe
- B. Care centered
- C. Efficient
- D. Effective

---

**Answer: B**

---

---

**Question: 4**

---

\_\_\_\_\_ can be measured by how well evidence-based practices are followed, such as the percentage of time diabetic patients receive all recommended care at each doctor visit, the percentage of hospital-acquired infections, or the percentage of patients who develop pressure ulcers (bed sores) while in the nursing home.

- A. Safe care
- B. Equitable care
- C. Effective care
- D. Timely care

---

**Answer: C**

---

---

**Question: 5**

---

Today's patients' perception of the quality of our healthcare system is not favourable. In healthcare, quality is a household word that evokes great emotion, including:

- A. Frustration and despair, exhibited by patients who experience healthcare services firsthand or family members who observe the care of their loved ones
- B. Anxiety over the ever-increasing costs and complexities of care
- C. Patient centered measures
- D. Timely care that may be experienced in terms of performance of services

---

**Answer: A, B**

---

---

**Question: 6**

---

There is a story of an intensive care unit (ICU) at Dominican Hospital in Santa Cruz County, California. Dominican, a 379-bed community hospital, is part of the 41-hospital Catholic Healthcare West system. "We used to replace ventilator circuit for incubated patients daily because we thought this helped to prevent pneumonia," explained Lee Vanderpool, vice president. "But the evidence shows that the more you interfere with that device, the more often you risk introducing infection. It turns out it is often better to leave it alone until it begins to become cloudy, or 'gunky,' as the no clinicians say." The hospital staff learned an important lesson from this experience that:

- A. Evidence is more powerful than intuition
- B. Intuition is more powerful than evidence
- C. Efforts improve mortality rate
- D. Introduction of a new protocol, or any new idea, involves education

---

**Answer: A**

---

---

**Question: 7**

---

A number of attributes can characterize the quality of healthcare services. As there are different groups involved in healthcare, such as physicians, patients and health insurers, tend to attach different levels of importance to particular attributes and as a result define quality care differently. Which of the following is/are NOT out of those attributes?

- A. Technical performance

- B. Responsiveness to patient preferences
- C. Excess staff
- D. Amenities

---

**Answer: C**

---

---

**Question: 8**

---

Quality and technical performance refers to how well current scientific medical knowledge and technology are applied in a given situation. It is usually assessed in terms of:

- A. Timeliness and accuracy of the diagnosis
