Question: 4		
What can a technician do to ensure that no malicious code can be intro through physical access?	duced into any of the servers	
A. Set USB 3 0 to disabled B. Set Secure Boot Policy to enabled C. Set User Accessible Ports to disabled D. Set UEFI Variable Access to disabled		
	Answer: C	
Since normal iDRAC credentials are used for logging in, iDRAC Direct works as a secure crash cart with the additional advantage of extensive hardware management and service diagnostics. This can be an attractive option for securing physical access to the server in remote locations (host USB ports and VGA outputs can be disabled in this case)		
Question: 5		
A technician is installing a new server and is not getting any link lights port. They have verified that the cable and switch port are working.  What could be causing this issue?  A. iDRAC has an Express license  B. IP has not boon set the Lifecycle Controller	s on the iDRAC management	
C. iDRAC has been disabled in the lifecycle Controller D. iDRAC firmware update is currently in progress		
	Answer: D
