Question: 1

With which traditional solutions is Centera designed to compete?

- A. DAS
- B. NAS
- C. SAN
- D. Tape and Optical Storage

Answer: B

Question: 2

What is the minimum number of Gen4LP nodes required to support CPP protection?

- A. 4
- B. 8
- C. 16
- D. 32

Answer: B

Question: 3

Which method does CUA use to write files 74 KB in size or less to EMC Centera?

- A. Bundled
- B. CDF, BLOB
- C. Containerized
- D. Embedded BLOBs

Answer: D

Question: 4

A customer implemented an EMC Centera and performed acceptance testing by writing 4 TB of data to the EMC Center

a. After acceptance testing is complete the customer successfully issued delete calls to all the data. The next day the customer observes that the free space on the EMC Centera has NOT significantly changed after the deletion.

How is this possible?

- A. A purge command must be issued to reclaim the space
- B. Garbage collection has not yet swept the data
- C. Reflections have consumed the space
- D. Retention has been set

Answer: B

Question: 5

Click the Exhibit button

During the design phase of a C2C migration it is discovered that both the production and DR EMC Centeras have been offline for numerous, long periods of time due to customer power issues.

The production EMC Centera cannot be considered to have a good copy of dat

a. Which design will ensure a good copy of data on the new EMC Centeras given the following conditions?

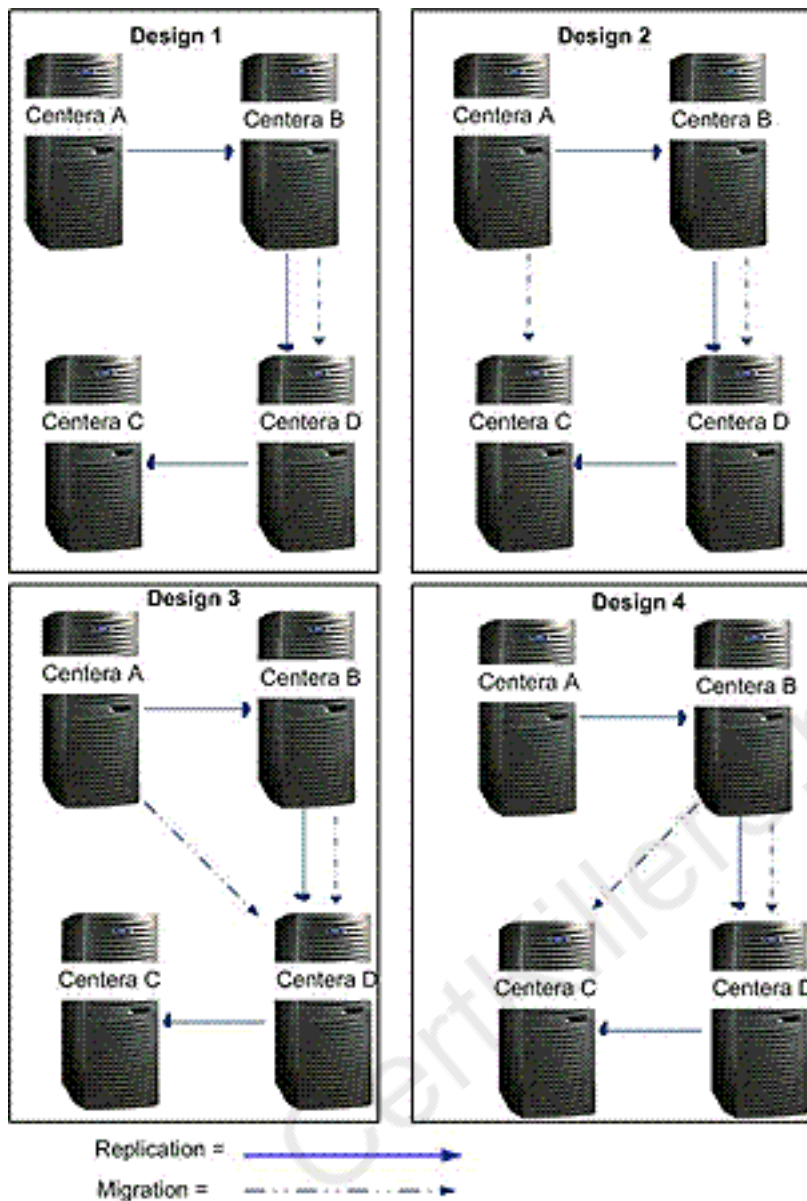

EMC Centera A is the old production EMC Centera

EMC Centera B is the old DR EMC Centera

EMC Centera C is the new production EMC Centera

EMC Centera D is the new DR EMC Centera

CertKillers.net

- A. 1
- B. 2
- C. 3
- D. 4

Answer: C

Question: 6

You have just completed a C2C install and must run a health report on both EMC Centera clusters. Which commands will you run on each cluster in the C2C utility?

- A. c2c> start healthc2cHealth>run
- B. c2c > diagnose healthc2cHealth>run

- C. c2c> healthc2cHealth>run
- D. c2c> check healthc2cHealth>run

Answer: C

Question: 7

A customer received an email from EMC Centera indicating that a disk drive failed in node c001n05. Which process indicates that the data has been properly reprotected?

- A. Disk regeneration
- B. Disk triage
- C. Node regeneration
- D. Node regeneration timeout settings

Answer: A

Question: 8

What type of content is typically stored on Centera?

- A. Dynamic
- B. Fixed
- C. OLTP
- D. Transactional

Answer: D

Question: 9

Which type of backups are supported by CBRM?

- A. Incremental, Full, Automatic, Manual
- B. Incremental, Full, Differential, Automatic
- C. Incremental, Full, Differential, Continuous
- D. Incremental, Full, Differential, Date Range

Answer: D

Question: 10

A customer has an existing Gen4 cluster and purchased new Gen4LP nodes. Which requirement must be confirmed for the LP nodes to be successfully added?

- A. All nodes in the cluster must have the same drive sizes
- B. CentraStar code must be at 3.1.3 or later

- C. CentraStar code must be patched to sp3
- D. LP nodes must be access nodes in a heterogeneous cluster

Answer: B
