Question: 1	
- Question: 1	
Your company is covered under a liability insurance policy, which provid	les various liabilitycoverage
for information security risks, including any physical damage of assets, l	
the following risk management techniques is your company using?	,
A. Risk acceptance	
B. Risk transfer	
C. Risk avoidance	
D. Risk mitigation	
	Anguran D
	Answer: B
Question: 2	
You have successfully installed an IRM server into your environment. Th	
to protect the company's videos, which are available to all employees b	
log on to the WSS 3.0 server with administrator permissions and naviga	
What option should you now choose so that you can input the RMS server to use?	ver name for the wss 3.0
server to use:	
A. Self-service site management	
B. Content databases	
C. Information Rights Management	
D. Define managed paths	
	Answer: C
Question: 3	
You work as a security manager for Qualxiss Inc. Your Company involves	
deciding over company issues. You have detected a security breach issu	
Which of the following procedures regarding the breach is involved in the	ne observe phase of the
OODA loop?	
A. Follow the company security guidelines.	
B. Decide an activity based on a hypothesis.	
C. Implement an action practically as policies.	
D. Consider previous experiences of security breaches.	
	Answer: A

Question: 4		
-	e Regional Centers' e-mail, so that in the toolbar to see the case study.)	it is secure and encrypted?
A. Use EFS. B. Use IPSec. C. Use S/MIME. D. Use TLS.		
		Answer: C
Question: 5		
How long are cookies in effect	t if no expiration date is set?	
<ul><li>A. Fifteen days</li><li>B. Until the session ends.</li><li>C. Forever</li><li>D. One year</li></ul>		
		Answer: B
Question: 6		
However, in the last few days,		
A. Smurf attack B. Sniffer attack C. Cryptographic attack D. FMS attack		
		Answer: A
Question: 7		
Which of the following statem	nents are true about Dsniff?	

A. It is a virus.

B. It contains Trojans.

C. It is antivirus.

Each correct answer represents a complete solution. Choose two.

D. It is a collection of various hacking tools.	
	Answer: B,D
Question: 8	
Based on the information given in the case study, which two authenticate to allow customers to access their photos on the Web site? (Click the Exhibit button on the toolbar to see the case study.) Each correct answer represents a part of the solution. Choose two.  A. Basic authentication without SSL B. Digest authentication with SSL C. Integrated Windows authentication D. Anonymous access E. Basic authentication with SSL F. Digest authentication without SSL	tion methods should youuse
	Answer: B,E
Question: 9	7.11.511 (1.1. 2).2
Which of the following are the goals of the cryptographic systems? Each correct answer represents a complete solution. Choose three.  A. Availability B. Authentication C. Confidentiality D. Integrity	
	Answer: B,C,D
Question: 10  John works as an Exchange Administrator for Apple Inc. The company has ActiveDirectory domain-based network. The network contains several V. Threeof them have been configured as domain controllers. John complated Administrator thathe is unable to manage group memberships. Which compare roles is responsible for managing group memberships?  A. PDC emulator B. Infrastructure master C. Schema master D. RID master	Vindows Server 2003 servers. ins to the Network
	Answer: B

Question: 11		
	uding status report, progress m	ocess of collecting and distributing leasurements, and forecasts. Which of
A. Perform Quality Control B. Verify Scope C. Report Performance D. Control Scope		
		Answer: C
Question: 12		
network. The company is awar Hence, management has assig uses the nmap port scanner ar nmap -PN -psl IP_Address_c He analyzes that the server's T	re of various types of security agned John a project to port scar nd issues the following comma of_Company_Server TCP ports 21, 25, 80, and 111 and	Inc. The company has a Linux-based attacks and wants to impede them. In the company's Web Server. For this, he and to perform idle port scanning:  The open.  The during this entire process to mitigate
		Answer: A
Question: 13 Which of the following protoco	ols provides secured transactio	on of data between two computers?
A. SSH B. FTP C. Telnet D. RSH		
		Answer: A
Question: 14		

A firewall is a combination of hardware and software, used to provide security to a network. It is used

to protect an internal network or intranet against unauthorized access from the Internet orother
outside networks. It restricts inbound and outbound access and can analyze all trafficbetween an
internal network and the Internet. Users can configure a firewall to pass or blockpackets from
specific IP addresses and ports. Which of the following tools works as a firewall forthe Linux 2.4
kernel?

- A. IPChains
- B. OpenSSH
- C. Stunnel
- D. IPTables

Answer: D

## **Question: 15**

Which of the following concepts represent the three fundamental principles of informationsecurity? Each correct answer represents a complete solution. Choose three.

- A. Privacy
- B. Availability
- C. Integrity
- D. Confidentiality

Answer: B,C,D

## Question: 16

You work as a Software Developer for Mansoft Inc. You create an application. You want to use the application to encrypt data. You use the HashAlgorithmType enumeration to specify the algorithm used for generating Message Authentication Code (MAC) in Secure Sockets Layer (SSL) communications.

Which of the following are valid values for HashAlgorithmType enumeration? Each correct answer represents a part of the solution. Choose all that apply.

- A. MD5
- B. None
- C. DES
- D. RSA
- E. SHA1
- F. 3DES

Answer: A,B,E

#### **Question: 17**

John works as a professional Ethical Hacker. He has been assigned a project to test the security of

www.we-are-secure.com. He wants to test the effect of a virus on the We-are-secure server. He injects the virus on the server and, as a result, the server becomes infected with the virus even though an established antivirus program is installed on the server. Which of the following do you thinkare the reasons why the antivirus installed on the server did not detect the virus injected by John?

Each correct answer represents a complete solution. Choose all that apply.

- A. The virus, used by John, is not in the database of the antivirus program installed on the ser ver.
- B. The mutation engine of the virus is generating a new encrypted code.
- C. John has created a new virus.
- D. John has changed the signature of the virus.

	Answer: A,B,C,D
Question: 18	
Which of the following types of virus is capable of changing its signature	e to avoid detection?
A. Stealth virus	
B. Boot sector virus	
C. Macro virus	
D. Polymorphic virus	
	Answer: D
Question: 19	
Which of the following protocols can help you get notified in case a rout	er on a network fails?
A. SMTP	
B. SNMP	
C. TCP	
D. ARP	
	Answer: B

Computer networks and the Internet are the prime mode of Information transfer today. Which of the following is a technique used for modifying messages, providing Information and Cyber security, and reducing the risk of hacking attacks during communications and message passing over the Internet?

A. Cryptography

Question: 20

- B. OODA loop
- C. Risk analysis
- D. Firewall security

	Answer: A
Question: 21	
In a complex network, Router transfers data packets by observing some metrics provided in the routing table. Which of the following metrics is table?	•
A. Bandwidth B. Load C. Delay	
D. Frequency	
	Answer: D
	V
Question: 22	
Mark is implementing security on his e-commerce site. He wants to ens message is really the one he claims to be. Which of the following technithis?	
A. Packet filtering B. Authentication C. Firewall D. Digital signature	
	Answer: D
Question: 23	
You work as a Network Administrator for Net World Inc. The company h You have configured an Internet access router on the network. A user co access a resource on the Web. You know that a bad NAT table entry is ca to clear all the entries on the table. Which of the following commands we	omplains that he is unable to using the issue. You decide
A. show ip dhcp binding	
B. ipconfig /flushdns	
C. ipconfig /all D. clear ip nat translation *	
	Answer: D
	7.1101701115
Question: 24	

You are a Consumer Support Technician. You are helping a user troubleshoot computer-related

issues. While troubleshooting the user's computer, you find a malicious program similar to a virus or
worm. The program negatively affects the privacy and security of the computer and is capable of
damaging the computer. Which of the following alert levels of Windows Defender is set for
thisprogram?

A. Low

B. High

C. Severe

D. Medium

Answer: C

#### Question: 25

Which of the following provides a credential that can be used by all Kerberos-enabled servers and applications?

- A. Remote Authentication Dial In User Service (RADIUS)
- B. Internet service provider (ISP)
- C. Network Access Point (NAP)
- D. Key Distribution Center (KDC)

Answer: D

#### Question: 26

You work as an Exchange Administrator for TechWorld Inc. The company has a Windows 2008 Active Directory-based network. The network contains an Exchange Server 2010 organization. The messaging organization contains one Hub Transport server, one Client Access server, and two Mailbox servers.

You are planning to deploy an Edge Transport server in your messaging organization to minimize theattack surface. At which of the following locations will you deploy the Edge Transport server?

- A. Active Directory site
- B. Intranet
- C. Behind the inner firewall of an organization
- D. Perimeter network

Answer: D

#### Question: 27

You are a Product manager of Marioxiss Inc. Your company management is having a conflict with another company Texasoftg Inc. over an issue of security policies. Your legal advisor has prepared a document that includes the negotiation of views for both the companies. This solution is supposed tobe the key for conflict resolution. Which of the following are the forms of conflict resolution that

have been employed by the legal advisor?
Each correct answer represents a complete solution. Choose all that apply.

- A. Orientation
- B. Mediation
- C. Negotiation
- D. Arbitration

Answer: B,C,D

### Question: 28

You work as the Senior Project manager in Dotcoiss Inc. Your company has started a software project using configuration management and has completed 70% of it. You need to ensure that the network infrastructure devices and networking standards used in this project are installed in accordance with the requirements of its detailed project design documentation. Which of the following procedures will youemploy to accomplish the task?

- A. Physical configuration audit
- B. Configuration control
- C. Functional configuration audit
- D. Configuration identification

Answer: A

#### Question: 29

Availability Management allows organizations to sustain the IT service availability to support the business at a justifiable cost. Which of the following elements of Availability Management is used to perform at an agreed level over a period of time?

Each correct answer represents a part of the solution. Choose all that apply.

- A. Maintainability
- B. Resilience
- C. Error control
- D. Recoverability
- E. Reliability
- F. Security
- G. Serviceability

Answer: A,B,D,E,F,G

#### Question: 30

Your company is going to add wireless connectivity to the existing LAN. You have concerns about the security of the wireless access and wish to implement encryption. Which of the following would be thebest choice for you to use?

- A. WAP
- B. WEP
