Version: 9.0

Question: 1

When installing servers in a rack, a customer has left gaps between the servers. What should you tell this customer regarding the space between servers? (Select two.)

- A. It should be filled with blanking panels.
- B. It does not provide correct rack airflow.
- C. It provides easy access for servicing components.
- D. It allows for easier cable management.
- E. It allows for side-to-side component cooling.

Answer: A,B

Question: 2

A customer has a small branch office that requires a tower-based server solution. The customer runs office-based applications and wants lights-out management capability. Which HPE server family meets the customer's needs?

- A. ProLiant ML
- B. ProLiant DL
- C. ProLiant BL
- D. ProLiant MicroServer

Answer: A

Question: 3

You are installing a rack at customer site. How can you ensure redundant power to the rack?

- A. Install two power distribution units (PDUs) with each one connected to a power socket supplied by an independent electrical power source.
- B. Ensure 3-phase power is available in the data center.
- C. Connect an uninterruptible power supply (UPS) to redundant circuit breakers at the facility power source.
- D. Use two different power cords to connect the server to the power grid at the customer site.

Answer: C

Question: 4

A company needs a solution that provides SMB and NFS file shares. The solution must have a built-in data backup to Microsoft Azure.

Which HPE solution meets the customer's needs?

- A. StoreOnce 3520
- B. StoreEasy 1000
- C. StoreOnce VSA
- D. StoreVirtual VSA

Answer: B

Question: 5

A company plans to purchase new HPE servers. The company needs to maximize local storage capacity within the servers.

Which HPE servers should the company install?

- A. ProLiant BL460c Gen10
- B. ProLiant DL380 Gen10
- C. ProLiant ML110 Gen 9
- D. ProLiant DL360 Gen 9

Answer: B

Question: 6

A customer wants to decrease problem resolution time on their HPE infrastructure.

Why would this customer benefit from Insight Remote Support?

- A. It provides event diagnosis and automatic, secure submission of hardware event notifications to HPE.
- B. It provides health monitoring and alerting and suggests resolutions for common issues.
- C. It monitors 1600 system parameters and applies analytics to predict problems before they can lead to system or component failure.
- D. It maintains an up-to-date change log by recording hardware and system changes in real-time.

Answer: A

Question: 7

You are configuring an internal Smart Array controller on an HPE ProLiant server.

Which statement is true regarding the drives in the logical array?

- A. HDDs and SSDs cannot be mixed in the same logical array.
- B. SATA HDDs and SAS SSDs can be mixed in the same logical array.

- C. SAS HDDs and SATA HDDs can be mixed in the same logical array.
- D. SATA SSDs and SATA HDDs can be mixed in the same logical array.

Answer: A

Question: 8

DRAG DROP

A customer is expanding from local storage to a SAN environment for the first time. They plan to future proof their environment with a 16 Gb Fibre Channel. They also want to allow for future I/O expansion with new servers.

Identify the correct server and storage to meet the customer requirements.

Answer Area

Server model

Storage model

Answer:

Server model – HPE ProLiant DL380 Gen10

Storage model – HPE MSA 2040

Question: 9

You are installing HPE ProLiant servers into a rack that will be fully loaded. You also need to install four power distribution units (PDUs) in the rack.

How should you install the PDUs to maximize power distribution and space efficiency?

- A. at the top of the rack with the cables running between the RETMA rails
- B. horizontally on extension bars mounted directly to the frame for improved clearance
- C. in the bottom bay of the rack with the outlets facing the front

D. vertically, side by side on both sides of the rack with the outlets facing the center

Answer: D

Question: 10

A customer is building out their rack of servers and storage systems. They need a high-performance network with a simple centralized management capability and deep buffer support for iSCSI. They expect high growth in their virtualization environment.

Which solution will best meet the customer's needs?

- A. Aruba
- B. Altoline
- C. Arista
- D. FlexFabric

Answer: D
