## Version: 9.1

### Question: 1

Which two types of LSAs have a domain scope? (Choose two.)

- A. Type 7
- B. Type 2
- C. Type 10
- D. Type 5

**Answer: C,D**

### Question: 2

Click the Exhibit button.

```

[edit protocols bgp group AS65200]
user@R1# show
type external;
local-address 192.168.30.40;
neighbor 172.16.18.1 {
    peer-as 65200;
}

[edit routing-options]
user@R1# show
static {
    route 172.16.18.1/32 next-hop [ 10.11.1.1 10.11.2.1 ];
}

```

Referring to the exhibit, what must be added to the existing configuration to ensure that per-prefix load balancing occurs?

- A. multihop

- B. keep all
- C. multipath
- D. family inet unicast

---

**Answer: A**

---

---

**Question: 3**

---

You are asked to configure a new Layer 3 VPN.  
In this scenario, which routing-instance type must be used?

- A. vpls
- B. evpn
- C. vrf
- D. 12vpn

---

**Answer: C**

---

---

**Question: 4**

---

Which authentication strategy authenticates IS-IS hello PDUs only?

- A. interface authentication
- B. area authentication
- C. domain authentication
- D. level authentication

---

**Answer: A**

---

Explanation:

The next set of commands adds the required hello authentication to each of r5's level 2 interfaces. Authentication is not configured on interface lo0 because LSP flooding and adjacency formation do not occur on this virtual interface:

```
[edit protocols isis] lab@r5# set interface as1.0 hello-authentication-type md5
```

[https://www.juniper.net/documentation/en\\_US/junos/topics/reference/configuration-statement/hello-authentication-type-edit-protocols-isis](https://www.juniper.net/documentation/en_US/junos/topics/reference/configuration-statement/hello-authentication-type-edit-protocols-isis)

---

**Question: 5**

---

Click the Exhibit button.

```
[edit interfaces]
user@router# show
ge-1/0/0 {
    unit 0 {
        family inet {
            filter {
                input inbound_filter;
                output outbound_filter;
            }
            policer {
                input inbound_policer;
                output outbound_policer;
            }
            address 10.10.100.1/24;
        }
    }
}
```

Referring to the exhibit, in which order will ICMP traffic be processed by the configured filters and policers for interface ge-1/0/0?

- A. input filter, input policer, output policer, output filter
- B. input policer, input filter, output policer, output filter
- C. input filter, input policer, output filter, output policer
- D. input policer, input filter, output filter, output policer

---

**Answer: C**

---
