Lotus Notes Domino 8.5 Application Development Foundation Skills

D. Document

Answer: B

QUESTION: 105
The Show Single Category option of an embedded view does what?

A. Dynamically adds a category column to a view, based on a formula
B. Displays only a single column of a view, based on a formula filter
C. Displays only a single category value of a categorized view, based on a formula
D. Combines certain documents in the view to display in a single view category, based on a formula filter

Answer: C

QUESTION: 106
Greg created a new application that will be used by members of the Accounting department. He sees that there is a group in the Domino directory that already contains all of the members of the Accounting department, and it is a Mail only group. How can he use that group in the ACL of his application to control access?

A. He needs to change the group type to Mail and ACL.
B. He needs to change the group type to Multi-purpose.
C. He doesn't need to do anything. All group types can be used for ACL access.
D. He has to create a copy of the group, and make the new group of type Access Control List only. Groups can be used for mail or ACL access, but not both.

Answer: B

QUESTION: 107
Mickey wants to allow soft deletions in his database. How does he enable this action?

A. By selecting the Advanced Database property,Allow soft deletions.
B. By selecting the Form property Allow soft deletions, for all forms that should have this property.
C. He doesn't need to do anything. All databases on a Domino server have soft deletions enabled automatically.

D. By adding a field called $SoftDelete, with a computed value of "1", to all documents that should have soft deletions enabled.

Answer: A

QUESTION: 108
Barney created a form that has a field that should always be a number with exactly two decimal places. How does he make sure the field value has the correct number of decimal places?

A. It should be a field of type Currency.
B. It should be a number field, with an Input Translation formula of:@Decimal(@ThisValue; 2)
C. It should be a text field, with an Input Translation formula of:@TextToNumber(@ThisValue; 2)
D. It should be a number field, with the Decimal Places option set to Fixed, and a value of 2

Answer: D

QUESTION: 109

A. Set the field type to Calendar
B. Set the field type to Calendar/Time
C. Set the field style to Calendar/Time control
D. Set the field style to Notes Calendar control

Answer: C

QUESTION: 112
Barb is the lead developer for the Sales application and the Travel application. Each application consists of multiple databases. Within the application navigator, Barb would like to be able to list the databases of the Sales application together and then separate from the Sales application, to list the databases of the Travel application together. How can she do this task?

A. For each application, create a subfolder under the Data folder. Move each set of databases to the appropriate subfolder. Drag each folder onto the application navigator.
B. Click the Folders icon in the application navigator. Select the option toCreate a new Working Set. Name the Working Set "Sales" and select the databases that comprise the Sales application. Perform a similar procedure for the Travel application.
C. From Domino Designer select Create > Working Set. Specify "Sales" for the name. From the Application properties of each database of the Sales application, select "Sales" from the Working Set drop-down list. Perform a similar procedure for the Travel application.

D. Edit the Application properties of each database that comprises the Sales application. On the Design tab, specify Sales for the Working Set option. Repeat for each database of the Sales application. Perform a similar procedure for the Travel application.

Answer: B

QUESTION: 113
Geoff has recently upgraded to Notes Domino 8.5 and has been exploring the various options within Domino Designer in Eclipse. What can Geoff do to see his applications within the application navigator of Domino Designer in Eclipse?

A. Right-click an Application icon from the Notes workspace and select Open in Designer. The application navigator always opens, but it can be repositioned. Other views, such as Outline can be moved or closed if wanted.
B. Right-click an Application icon from the Notes workspace and select Open in Designer.If the application navigator is not visible, select Window > Show Hidden Views > Applications. Other views, such as Outline, can also be moved or closed.
C. Right-click an Application icon from the Notes workspace and select Open in Designer.If the application navigator is not visible, select Window > Show Eclipse Views > Applications. Other views, such as Outline, can also be moved or closed.
D. Right-click an Application icon from the Notes workspace and select Open in Designer. The applicationnavigator always opens in the left pane, just as in Domino Designer 8.0 and earlier releases. Other views, such as Outline can be moved or closed if wanted.

Answer: C
