IBM SmartCloud Notes Hybrid Config & Onboard Data Transfer

QUESTION: 98

Bob is a new IBM SmartCloud user and has just been provisioned. He wants to download the SmartCloud Notes client configuration tool. Which of the following options is true?

- A. He must log in to the SmartCloud website using his internet address and IBM Lotus Notes password.
- B. He must log in to the SmartCloud website using his internet address and a temporary password issued to him by his IBM Lotus Domino administrator.
- C. He must log in to the SmartCloud website using his full Lotus Notes name and a temporary password issued to him by his Lotus Domino administrator.
- D. The client configuration tool is an attachment in the Welcome message that Bob received after he was provisioned.

Answer: B

QUESTION: 99

George uses IBM Lotus Notes clients on two PCs to access his server-based mail file. After provisioning, he finds that one PC is not seeing new mail. What is the most likely reason for this?

- A. The PC is running an old version of the Lotus Notes client and needs to be upgraded.
- B. Using 2 PCs in this way is not supported.
- C. George has run the IBM SmartCloud Notes Client Configuration tool on only 1 of the PCs.
- D. George's administrator has only set up 1 SmartCloud Notes entitlement for him.

Answer: C

QUESTION: 100

Which one of the following statements correctly describes the catch-up replication carried out by the IBM SmartCloud Client Configuration tool?

- A. The process fully replicates the current on-premises replica with the replica in IBM SmartCloud Notes.
- B. The process sends new documents from the current on-premises replica to the replica in IBM SmartCloud Notes.
- C. The replication is carried out in the background and is transparent to the user.
- D. The replication sends just the first 40 K of documents with no attachments.

Answer: B

QUESTION: 101

Jane is the administrator for a number of mobile workers who use IBM Lotus Notes on their laptops. The users are being provisioned with mail file transfer. She wants to simplify the process for the users, so she sends her own copy of the Client Configuration tool (config.nsf) to all the users. Which one of the following statements is true?

- A. This will not work because each user needs their own config.nsf.
- B. This will work once the users replicate config.nsf with the IBM SmartCloud Notes server.
- C. This will work.
- D. Jane's config.nsf will enable users to connect to the SmartCloud Notes server, but they will need to carry out catch-up replication themselves.

Answer: A

QUESTION: 102

Which one of the following statements is correct about the Welcome message that is generated by the Onboarding Transition Tool (OTT)?

- A. The Welcome message is emailed to users after they are provisioned.
- B. The Welcome message is needed only for IBM Lotus Notes client users.
- C. The Welcome message contains the client configuration tool as an attachment.
- D. The Welcome message should be configured so that replies that are sent by users are addressed to OTT.

Answer: D

QUESTION: 103

The Detect Replica Deletion agent runs, but the user status remains "Pending On-Premise Delete" in the Onboarding Transition Tool (OTT). Which of the following options could be the cause?

- A. The agent requires Allow restricted operations security rights.
- B. The agent does not have rights to delete documents in the AdminP database.
- C. The AdminP delete request was not approved.
- D. The agent does not have access to the IBM SmartCloud mail file.

Answer: C

QUESTION: 104

A user was provisioned in the IBM SmartCloud Notes administration portal, but the status in the Onboarding Transition Tool (OTT) still indicates Data Committed. What is the first step to take to troubleshoot the problem?

- A. Run the Check Configuration in the SmartCloud Notes administration portal.
- B. Check the user status in the SmartCloud Notes administration portal.
- C. Open the OTT agent log and look at the entries for the Check Mail Server agent.
- D. Open the Staging Server log and look at the Miscellaneous events.

Answer: C

QUESTION: 105

Which one of these statements about Direct Replication is true?

- A. Direct Replication replicates mail from the Staging Server to the IBM SmartCloud Notes server.
- B. Direct Replication replicates mail from the user's home server to the SmartCloud Notes server.
- C. Direct Replication can only be used for users with no IBM Lotus Notes client.

D. The Direct Replication agent starts trying to replicate a user's mail file once the user's mail file is encrypted.

Answer: B

QUESTION: 106

After users' mail has been transitioned from the on-premises environment to the IBM SmartCloud Notes service, what happens to their existing mail file on the on-premises mail server?

A. The Onboarding Transition Tool (OTT) submits an Administration Process request that deletes the mail file from the user's on-premises mail server.

B. The OTT submits an Administration Process request to delete the mail file from the user's on-premises mail server that must be approved by an on-premises administrator before the mail file is deleted.

C. The OTT sends an email to the on-premises administrators group to advise them that users have been transitioned and for the on-premises administrators to delete the users' mail file from their on-premises mail server.

D. The OTT sends a message to users who have been transitioned to the IBM SmartCloud service to create an archive of their old mail file and then delete their mail file from their on-premises server.

Answer: B
