LOT-985

Developing IBM Lotus Notes and Domino(R) 8.5 Applications

Answer: A

QUESTION: 182
Robert is adding an editable field called CountryLocation to the Member form in the Video Rental application. The field should show a value of USA when the document is first created. What formula would accomplish this behavior?

A. "USA" in the field's Default Value object
B. "USA" in the field's Input Enabled object
C. "USA" in the field's Input Validation object
D. "USA" in the field's Input Translation object

Answer: A

QUESTION: 183
Sara's application needs to use the same graphic in several forms. When she designed the application, she pasted the graphic into each form. However, when she views documents that were created with these forms, the browser reacts very slowly. What should Sara do to correct this problem?

A. Remove the graphics from the forms.
B. Convert the graphic format to a TIFF and paste it back into the forms.
C. Place the graphic in the database as an image resource and reference the image resource in all related forms.
D. Place the graphic file on the server in the graphics directory and use pass-through HTML to reference the graphic.

Answer: C

QUESTION: 184
Henry has an executable file stored as a file resource in his database. He wants to make this file available for use via a Web browser, using the URL syntax: http://server/db.nsf/filename?OpenFileResource. What additional things does he need to do?

A. He needs to enable the "Use File Resources on the Web" database property.
B. An executable file cannot be made available to Web browsers as a file resource.

C. He doesn't need to do anything else. The file will be available to users as is.
D. He needs to update the MIME type property in the File Resource properties field to "application/executable."

Answer: C

QUESTION: 185
Parker is examining a WSDL file for his Lotus Domino Web service. What role does the Types element have in the file?
