*IBM PureApplication System Sales MasteryTest v1*

**QUESTION: 21**

What best describes the cumulative business value of the IBM PureApplication™ System?

- A. Resource utilization rates that consistently run in high double digits
- B. Significant improvement to an organization's business agility
- C. Ability to meet all service level agreements
- D. Significant reduction in unplanned outages

**Answer: B**

**QUESTION: 22**

All of the following are business challenges that can be addressed by the IBM PureApplication™ System EXCEPT which option?

- A. Developing more resource-intensive business capabilities
- B. Reducing the complexity of IT and its associated costs
- C. Simplifying the processes implemented to handle IT complexity
- D. Reducing the time to value of bringing new business capabilities on line

**Answer: A**

**QUESTION: 23**

Which of the following is NOT a capability of the IBM PureApplication™ System?

- A. Includes all the infrastructure and middleware application services needed for web applications
- B. Enables dynamic customization for seamless growth
- C. Has built-in workload elasticity to handle changes in demand
- D. Runs transactional databases in native mode

**Answer: D**

**QUESTION: 24**

The IBM PureApplication™ System is offered in     different configurations to meet the different system needs of our customers.

- A. Two
- B. Four
- C. Six
- D. Eight

**Answer:** B

**QUESTION:** 26

Which one of the following can be created in the IBM PureApplication™ System, exported and imported for sharing across systems, and is available in two types - virtual applications and virtual systems?

- A. Virtualized infrastructure services
- B. Customized scripts
- C. Software application patterns
- D. Scaling policies

**Answer:** C

**QUESTION:** 27

When discussing Expert Integrated Systems with clients, which of the following best characterizes the current environment the systems are designed to help?

- A. An environment of accelerating change, increasing business risk, and IT complexity
- B. An environment of constant change, simplification, and reduced business risk
- C. An environment of managed change, frequent communication issues, and IT complexity
- D. An environment of managed change, IT complexity, and constant upgrade demands

**Answer:** A
