Version: 7.0

Question: 1

Which option contains a pair of terms that both are Application Lifecycle Management imperatives which improve organizational productivity?

- A. Real-time Traceability and In-context improvement
- B. Lifecycle Collaboration and Continuous Quality
- C. Development Intelligence and Continuous Improvement
- D. Continuous Planning and Full Stack Provisioning

Answer: B

Explanation:

* Open Services for Lifecycle Collaboration (OSLC).

* Continuous quality assurance and testing

Quality assurance (QA) and testing are full-lifecycle endeavors that are addressed throughout the entire software and systems lifecycle.

Question: 2

In order to deliver an enhanced customer experience that is differentiated and engaging, DevOps can help a business do which critical task?

- A. accelerate key feature innovation
- B. obtain and respond to customer feedback
- C. increase the security of the customer experience
- D. optimize the performance of the client interface

Answer: B

Explanation:

DevOps emphasizes feedback allowing the business to understand and respond to the needs of all customers, both internal and external. Shortening and amplifying feedback processes allows for corrections to be continually made, thus increasing quality.

Question: 3
