Solomon 6.0 Customization Manager

A. You can delete items from the list.
B. You can add new items to the list.
C. You can in-activate an item in the list.
D. You can change the description of an item that appears in the list.

Answer: C, D

QUESTION: 69
Which data bound object type would not need a label object to display a description of the data in the field?

A. Text box
B. Check box
C. Combo box
D. All data bound objects would need a label object inserted

Answer: B

QUESTION: 70
Which of the following statements is true about a field TabIndex?

A. If you want the cursor to skip over a field when using the Tab key to move around the screen you should set the TabIndex to 0 or 99.
B.   When in Customize Mode you can display the TabIndex values for all the fields on the screen at the same time.
C.   When you move fields around, Solomon automatically adjust the TabIndex so that the movement through the screen matches the physical layout.
D.   The TabIndex property values determine how users move through the screen using the TAB key, not the physical placement of the controls on the screen.

Answer: D

QUESTION: 71
Which property can be used to implement field-level security?

A. Visible
B. Mask
C. Fieldclass
D. Accessible

QUESTION: 72
Which statement is NOT true about the Mask property?

A. It can be used to control what a user can enter into a field.
B. It can control how the information in the field is displayed.
C. It can control the maximum number of characters that can be entered into a field.
D. Solomon comes with a pre-defined mask for phone numbers.

QUESTION: 73
How can you remove all customizations for a particular object in a screen at a given level?

A. Export the customizations, remove the customization for the object in the ASCII file, save and import the customization back into the database.
B. Set the Level appropriately, open the screen, select the object, and then use the Remove Changes for Object on the Customize menu list.
C. Set the Level appropriately, open the screen, select the object, and then use the Remove Changes for Screen on the Customize menu list.
D. Set the Level appropriately, open the screen, select the object, and then right click on the object and select Restore Defaults.

QUESTION: 74
Which of the following are reasons for using the Export Customizations feature?

A. To document control property customizations
B. To obtain a file containing user readable VBA code for a customization
C. To move customizations from the development database to the live database
D. To create a Supplemental Products level customization.

QUESTION: 75
While Solomon supports several different types of lookups which lookup type can NOT be modified in Customization Manager?

A. Fixed list
B. Database
C. User-Specified
D. All lookup types can be modified in Customization Manager

Answer: B
