### Version: 9.1

Question: 1	
A customer wants to reduce the disk allocation requirement for the root aggregate and incrusable storage by partitioning the disks into one large part and one small part. The small part is for the root aggregate and the large part for the data aggregates.  In this situation, what is this feature called?  A. ONTAP  B. storage virtual machine  C. Advanced Drive Partitioning  D. RAID	
Answer: C	
Question: 2	
A customer has a new 2-node ONTAP system. They have configured the cluster for iSCSI and access.  Which two statements are correct in this scenario? (Choose two.)	LUN
A. In a case of a node error, the broadcast domain will automatically be moved to the surviving n B. Create a single failover group with both nodes' ports, e0M and e0i, applied to each node iSCSI C. A best practice is to have at least one LIF per node per SVM for iSCSI access.  D. Use Asymmetric Logical Unit Assignment (ALUA), igroups and host-side multipath input/or (MPIO) for path management and resiliency with iSCSI.	LIF.
Answer: A,B	
Question: 3	
Starting with ONTAP 9.1, what is the maximum number of HA pairs that are supported when us SAN cluster?	ing a
A. 4 B. 2 C. 6 D. 8	
Answer: A	
Question: 4	

Click the Exhibit button.

What is a valid failover policy for a SAN LIF?		
A. disabled B. broadcast-domain-wide C. system-define D. local-only		
	Answer: B

Question: 5		
You are adding two new nodes into an existing switchless 2-node cluster. Which two statements are true in this scenario? (Choose two.)		
A. You first need to install the cluster interconnect switches to the existing B. You must make sure that the existing nodes are healthy and that all clust. The existing cluster must use clustered Data ONTAP 8.1 or later softwar D. You need to schedule downtime to add these two nodes.	ster links are up.	
(6)	Answer: A,B

Question: 6		
Your customer has filled out the customer installation worksheet. However, the customer's network environment is not set up and ready for the new ONTAP 9.1 system. The customer requests that you install the system and states that they will finish the configuration when they have acquired the appropriate network connections.  Which two statements are correct about this scenario? (Choose two.)		
A. You should cable a cluster so that the clusters interconnect traffic is on	a separate network from all	
other traffic.  B. You cannot install an ONTAP system without having the customer network.  C. You should cable all of the controllers and disk shelves, power on the system as-is for the customer to configure.  D. A cluster can be created without data network connections, but interconnect connection.	system, and then leave the	
	Answer: A,D	
Question: 7		

#### Please choose one of the following:

- Normal Boot.
- (2) Boot without /etc/rc.
- (3) Change password.
- (4) Clean configuration and initialize all disks.
- (5) Maintenance mode boot.
- (6) Update flash from backup config.
- Install new software first,
- (8) Reboot node.
- Selection (1-8)?

While planning for an installation, you download ONTAP 9.1 as requested by the customer. As you begin the installation, you determine that the system shipped with ONTAP 9.0 software installed. Because of this, you boot to the Special Boot Menu shown in the exhibit.

What should you use to upgrade the ONTAP software on the customer's cluster?

- A. Use option 6, "Update flash from backup config" to upgrade to ONTAP 9.1 software.
- B. Use option 7, "Install new software first," to upgrade to ONTAP 9.1 software.
- C. Use option 5, "Maintenance mode boot," and then use the software update command to upgrade to ONTAP 9.1 software.
- D. Use option 5, "Maintenance mode boot", and then use the system node image update command to upgrade to ONTAP 9.1 software.
