```

The administrator does not have access to the remote gateway.
Based on the debug output, which configuration change can the administrator make to the local

gateway to resolve the phase 1 negotiation error?

A. In the phase 1 network configuration, set the IKE version to 2.
B. In the phase 1 proposal configuration, add AES128-SHA128 to the list of encryption algorithms.
C. In the phase 1 proposal configuration, add AESCBC-SHA2 to the list of encryption algorithms.
D. In the phase 1 proposal configuration, add AES256-SHA256 to the list of encryption algorithms.

Answer: D

Explanation:

https://docs.fortinet.com/document/fortigate/7.0.0/administration-guide/238852

Question: 2

Refer to the exhibit, which shows the output of a web filtering diagnose command.

```
# diagnose webfilter fortiguard statistics list        # diagnose webfilter fortiguard statistics list
                                                        ...

Rating Statistics:                                      Cache Statistics:
======================                                  ======================

```

Which configuration change would result in non-zero results in the cache statistics section?

A. set server-type rating under config system central-management
B. set webfilter-cache enable under config system fortiguard
C. set webfilter-force-off disable under config system fortiguard
D. set ngfw-mode policy-based under config system settings

Answer: B

Question: 3

_____

Refer to the exhibits, which show the configuration on FortiGate and partial session information for internet traffic from a user on the internal network.

```
Configuration | Session

config system global
    set snat-route-change disable
end
config router static
    edit 1
        set gateway 10.200.1.254
        set priority 5
        set device "port1"
    next
    edit 2
        set gateway 10.200.2.254
        set priority 10
        set device "port2"
    next
end
```

```
Configuration | Session

If the priority on route ID 2 were changed from 10 to 0, what would happen to traffic matching that user session?

A. The session would remain in the session table, but its traffic would now egress from both port1

and port2.
B. The session would remain in the session table, and its traffic would egress from port2.
C. The session would be deleted, and the client would need to start a new session.
D. The session would remain in the session table, and its traffic would egress from port1.

Answer: D

Question: 5

What are two functions of automation stitches? (Choose two.)

A. Automation stitches can be configured on any FortiGate device in a Security Fabric environment.
B. An automation stitch configured to execute actions sequentially can take parameters from previous actions as input for the current action.
C. Automation stitches can be created to run diagnostic commands and attach the results to an email message when CPU or memory usage exceeds specified thresholds.
D. An automation stitch configured to execute actions in parallel can be set to insert a specific delay between actions.

Answer: BC
