Question: 1

Which of the following is a RuleSet versioning practice that is prevented by PRPC? (Choose One)

- A. Skipping RuleSet versions
- B. Having two unlocked versions of the same RuleSet
- C. Locking a RuleSet that has rules currently checked out
- D. Unlocking a RuleSet that was once locked

Answer: C

Question: 2

Which feature would you use to copy the highest version of every rule in a RuleSet to a new version? (Choose One)

- A. Copy/Merge RuleSet
- B. Lock and Roll
- C. Skim a RuleSet
- D. Refactor on import

Answer: C

Question: 3

What statements most accurately explains private check-outs? (Choose Two)

- A. When checking in a private checked-out rule manual merging might be required
- B. Use the check-out setting in the operator preferences to specify the preferred check-out method (standard/private)
- C. Private check-out is available if the rule is checked-out by someone else
- D. Locking a RuleSet prevents private check-outs
- E. Private check-out is only available for a user who has previously checked in the rule

Answer: A,C

Question: 4

Which of the following best describes the purpose of Application Express? (Choose One)

- A. To build a simple application that will be used for prototyping
- B. To build an application profile that will be fed into the Application Accelerator
- C. To build an enterprise-scale application that encourages reuse, including the Enterprise Class Structure
- D. To build an application "from scratch", when an Application Profile is not necessary or available

Answer: A

Question: 5

Which of the following statements is most accurate regarding declarative rules? (Choose One)

- A. Declarative rules run in a separate thread
- B. Declarative rules can only be used for numeric computation
- C. Declarative rules should only be used in pure business rules engine applications
- D. Declarative rules improve developer productivity and reduce risk by making PRPC responsible for executing the rules

Answer: D

Question: 6

Expressions that are backward chaining (set to “Whenever Used”) execute when _____. (Choose One)

- A. the target property is referenced ONLY in data transforms or activities
- B. the target property is referenced in any way
- C. dependent properties are changed
- D. data is committed to the database

Answer: B

Question: 7

Which of the following statements are true regarding declarative expressions and their scope? (Choose Two)

- A. Declarative expressions can be defined relative to the top level page OR an embedded page
- B. All declarative expressions must be defined relative to the work object
- C. Defining expressions directly on data classes can improve reusability of the expression
- D. The Applies To class of a declarative expression must derive from Work-
- E. Defining expressions directly on data classes means they will only run if the data class is a top level page

Answer: A,C

Question: 8

The evaluate all rows feature of a decision table can be used to _____? (Choose One)

- A. return multiple values to a declarative expression that calls it

- B. return the value of the last row where all conditions are met
- C. create a mechanism to calculate the sum of all matching rows
- D. set the value of a specific property for all pages in a page list

Answer: C

Question: 9

Which of the following factors is most critical when deciding between Decision Trees, Decision Tables and Map Values? (Choose One)

- A. Which rule form the business users who will maintain the rule feel most comfortable with
- B. Always consider Decision Trees before tables as they execute faster
- C. Only consider MapValues when there is one input parameter
- D. Which rule type provides the most optimal runtime performance

Answer: A

Question: 10

Given the following rules and assuming the expression is set to forward chaining (whenever inputs change), which action will cause the expression to fire? (Choose One)

- A. Changes to the values .Country or .State
- B. Referencing .TaxRate
- C. Referencing .Country or .State
- D. Changes to the values .Country or .State as well as references to .TaxRate

Answer: A

Question: 11

Which of the following are most accurate regarding utility functions? (Choose Two)

- A. Utility functions can use both the standard Java API and the PRPC Public API
- B. Utility functions are called by utility shapes in flows
- C. A new utility function should only be created if no other rules or provided functions can accomplish a given requirement
- D. Utility functions cannot access clipboard data
- E. It is recommended, but not required, that utility functions belong to a library

Answer: A,C
