Version: 6.0

Question: 1	
After a notable event has been closed, how long will the meta data for the Store by default?	hat event remain in the KV
A. 6 months. B. 9 months. C. 1 year. D. 3 months.	
	Answer: A
Explanation:	
By default, notable event metadata is archived after six months to keep the KV store from growing too large. Reference: https://docs.splunk.com/Documentation/ITSI/4.10.2/EA/TrimNECollections	
Question: 2	
Which of the following is a best practice for identifying the most effective an iterative ITSI deployment? A. Only include KPIs if they will be used in multiple services. B. Analyze the business to determine the most critical services. C. Focus on low-level services. D. Define a large number of key services early.	
	Answer: B
Explanation:	
Reference: https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/MKA A best practice for identifying the most effective services with which to start an iterative ITSI deployment is to analyze the business to determine the most critical services that have the most impact on revenue, customer satisfaction, or other key performance indicators. You can use the Service Analyzer to prioritize and monitor these services. Reference: Service Analyzer	
Question: 3	

When creating a custom deep dive, what color are services/KPIs in mainted topology view?	enance mode within the
A. Gray B. Purple C. Gear Icon D. Blue	
_	Answer: A
Explanation:	
When creating a custom deep dive, services or KPIs that are in maintenan color in the topology view. This indicates that they are not actively monitoralerts or notable events. Reference: Deep Dives	
Question: 4	
Which deep dive swim lane type does not require writing SPL?	
A. Event lane. B. Automatic lane. C. Metric lane.	
D. KPI lane.	
D. KPI lane.	Answer: D
D. KPI lane. Explanation:	Answer: D
	SPL. You can simply select a te the lane with the
Explanation: A KPI lane is a type of deep dive swim lane that does not require writing S service and a KPI from a drop-down list and ITSI will automatically popular corresponding data. You can also adjust the threshold settings and time ra	SPL. You can simply select a te the lane with the
Explanation: A KPI lane is a type of deep dive swim lane that does not require writing S service and a KPI from a drop-down list and ITSI will automatically popular corresponding data. You can also adjust the threshold settings and time rankeference: [KPI Lanes]	SPL. You can simply select a ite the lane with the ange for the KPI lane.
Explanation: A KPI lane is a type of deep dive swim lane that does not require writing S service and a KPI from a drop-down list and ITSI will automatically popular corresponding data. You can also adjust the threshold settings and time ra Reference: [KPI Lanes] Question: 5 Which of the following items apply to anomaly detection? (Choose all that A. Use AD on KPIs that have an unestablished baseline of data points. This perform it's magic. B. A minimum of 24 hours of data is needed for anomaly detection, and a	SPL. You can simply select a steet the lane with the lange for the KPI lane. It apply.) Is allows the ML pattern to

Use AD on KPIs that have an unestablished baseline of data points. This perform it's magic. B. A minimum of 24 hours of data is needed for anomaly detection, and a cohesive analysis. C. Anomaly detection automatically generates notable events when KPI dipattern.	SPL. You can simply select a ste the lane with the lange for the KPI lane. It apply.) Is allows the ML pattern to minimum of 4 entities for lata diverges from the

Reference: https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/AD Anomaly detection is a feature of ITSI that uses machine learning to detect when KPI data deviates from a normal pattern. The following items apply to anomaly detection:

- B) A minimum of 24 hours of data is needed for anomaly detection, and a minimum of 4 entities for cohesive analysis. This ensures that there is enough data to establish a baseline pattern and compare different entities within a service.
- C) Anomaly detection automatically generates notable events when KPI data diverges from the pattern. You can configure the sensitivity and severity of the anomaly detection alerts and assign them to episodes or teams. Reference: [Anomaly Detection]
